

MAKE YOUR OWN PROFESSIONAL STYLE PHOTO BOOK

You may be considering ordering one of the custom-bound books of personalised images on offer at many photo retail outlets or online, but perhaps you can't afford the hefty price tag, or you're looking for a system that will allow you to create your pages over time.

Now with Coral Coast's 'Photo Book' you can make your own personalised memory book with all the professionalism of the commercially bound albums, but at a fraction of the cost.

Consider the features:

- ✦ black leather cover with archival-quality black pages
- ✦ photo-safe adhesive allows repositioning of photographs
- ✦ 10 Sheets in either vertical or horizontal format
- ✦ comes in a deluxe black cloth-covered presentation box
- ✦ suitable for wedding albums, baby books, professional portfolios etc.

Simply peel off the protective covering from the self-adhesive pages...

... and affix photos and/or scrapbooking pages that have been printed to 8" x 12".

- ✦ Remember that when laying out your photo pages, several shots taken at the same time with a consistent theme can give a greater sense of unity and progression to a spread than you can achieve with a mix of varied images.
- ✦ Experiment with type faces, backgrounds and different image sizes to add interest to each spread.
